

Vishnu Burkhawala

Surat, Gujarat, India — +91 7265898005 — burkhawalavishnu@gmail.com — [LinkedIn](#) — [GitHub](#)

Summary

Full-stack developer and AI/ML enthusiast skilled in building real-world cross-platform applications integrating Java Spring Boot, Node.js, React/React Native, and Python ML. Proficient in MongoDB and MySQL for robust data handling and experienced in deploying intelligent ML-driven features to enhance user experience.

Education

Dharmsinh Desai University, Nadiad Jul 2023 – May 2026
B.Tech in Information Technology — **CGPA: 8.72/10**

Dr. S. & S.S. Gandhi College of Engineering, Surat Jun 2020 – Mar 2023
Diploma in Information Technology — **CGPA: 9.40/10**

Skills

- **Languages:** Java, JavaScript, Python, C++
- **Web/Mobile Dev:** React Native, Node.js, Express.js, Java (Spring Boot), MongoDB, MySQL
- **Version Control/Other Concepts:** Git, GitHub, OOP, DSA, REST APIs
- **AI/ML:** Machine Learning, Image Processing, YOLOv8, MediaPipe, Document Analysis
- **Soft Skills:** Teamwork, Communication, Problem-Solving, Adaptability, Time Management

Internship

Java/Android Mobile Developer – Leaf Drive Academy Jan 2023 – Jun 2023

- Built an Android application using Java for BRTS bus pass registration system, implementing robust form validation, authentication, and database interaction for daily commuters.
- Designed responsive and user-friendly UI components while integrating backend logic to ensure a smooth user experience and high usability across devices.

Projects

FinScopeAI - React.js, Java Spring Boot, MySQL, Python for ML [FinScopeAI](#)

- Built intelligent credit scoring system **analyzing bank documents and statements** (PDF) and **Account Aggregator** JSON data to categorize transactions and extract EMI patterns using NLP and rule-based logic.
- Integrated insights and predictive simulations into a dynamic React dashboard, enabling users to track spending trends, get personalized credit improvement tips, and assess credit score changes based on adjustments.

Linkify Social Media - React Native, Node.js, Express.js, MongoDB [Linkify](#)

- Developed a cross-platform social media app for iOS and Android with **real-time chat**, **ML-driven suggestions** using Association Rule-Based Learning, **post sharing**, and **request based following** features.
- Optimized data flow and performance using MongoDB and Node.js, enhancing engagement through AI-powered post and friend recommendations with seamless mobile-backend integration.

Clinico - React Native, Node.js, Express.js, MongoDB [Clinico](#)

- Currently building a modern customizable clinic management app with features like doctor-staff-patient coordination, appointment tracking, and an **integrated DICOM viewer** for medical imaging reports.
- Working on **integrating health wearables** for real-time vitals (e.g., heart rate), alongside a secure, scalable backend and real-time doctor-patient communication system.

Ring Try-On Using Image Processing - Python, MediaPipe, YOLOv8

- Currently developing an AI-based virtual ring try-on application supervised by **HOD Dr. Vipul K. Dabhi** and **Prof. Dr. Harshad B. Prajapati** using MediaPipe for hand tracking and YOLOv8 for detection.
- Implemented advanced **image processing** and spatial computations to accurately place rings on fingers, extending ML applications in vision-based retail experiences.

Accomplishments

300+ DSA Problems Solved:

- Solved 300+ DSA problems on [LeetCode](#) and [GeeksforGeeks](#), strengthening core problem-solving skills.

Top 5 Finalist at National-Level Hackathon – HackNathon:

- Developed an application that **analyzes Software Requirement Specification (SRS) documents** using Natural Language Processing (NLP) and analyze Frontend Design **auto-generates** the real time **test cases**.

Completed AI/ML Certification on Udemy:

- Gained hands-on experience with core Machine Learning algorithms and applied them to real-world scenarios and applications.
